Re-usable dual-cassette odour filter, filled with zeolite and additional active carbon filter

Air intake and stainless steel, filter and fan made of CNS 18/10

Fan motor unit

4 castors (2 can be locked)

SPECIAL FEATURES

SILEX S-Tronic AirClean

The S-Tronic AirClean combination unit consists of a SILEX® S-Tronic unit with weight reduction functionality and other optional modules (AirClean 1000) and a cabinet style air extraction unit. The AirClean unit is used to eliminate any cooking odours, smells, vapours and fumes wherever it is installed. It is especially suited for front cooking. The S-Tronic AirClean can be used wherever it proves impossible to fit or mount extractor hoods, or a show-effect is wanted near the customer.

SILEX – The appliance

The complete system is equipped with 4 castors, 2 of which can be locked. A multi-layer filter made of CNS 18/10, a grease collection sump, a heavy duty cyclone fan motor unit, a dual cassette odour filter filled with zeolite and an optional active carbon filter unit are also part of the system.

SILEX – Clean air

The S-Tronic AirClean ensures, that you have clean air and an odourless environment when cooking. Eliminating odours and grease vapours in the extracted air, wherever it is installed. A single power supply drives the whole system.

SILEX® ensures clean, continuous quality and power saving cooking technology.
